To Whom it May Concern;

My name is Elizabeth Barris, I am electrosensitive, but have not always been this way. It happened to me after many years of unfettered cell, cordless phone and WIFI use and then living about a block from a stealth cell antenna farm...I didn't see it so I didn't know it was there...it was stealth...hidden from view. I write you today to let you know that I can no longer go into Starbucks or even drive down my own street without wearing protective shielding. I am okay in Starbucks for a short while, anywhere from 5 minute to 45 minutes, depending on who is using what in there in terms of the WIFI, where I am standing, where their laptop is and where the router is. Anyway, my point is, my whole life has changed because of the wireless exposures I have received. I now have health effects as a direct response to this radiation and it is life changing.

In approx. 2011 (to my recollection) I consulted with the GAO on their letter in response to Congress asking them about wireless safety standards. I don't have to tell you...there are none. The GAO discarded most of my suggestions with the exception of possibly tougher standards for children and pregnant women. This is great but I am neither and neither is most of the population. I realize this is also quite possibly a losing proposition, but all I can do is my part in asking again that you consider non thermal effects from non ionizing radiation, that you take all the military knowledge on RF that is currently being used by our army and air force and the fact that our doctors use it to heal bone and now even cancer, and do the right thing and start warning people about the potential health effect and also start to make our streets and coffee shops once again safe for people to roam without being attacked by radiation from cell towers. WIFI, smart meters, smart grid, satellite or any kind of radiation exposure. JUST HARD WIRE IT!!! WHY IS THAT SO DIFFICULT???

I will admit I am burnt out on requesting things from the FCC. I have resorted to suing as my requests have fell on deaf ears on the passed. Below you will see a copy of our lawsuit against the utilities in the state of CA for heath effects from RF radiation from smart meters and smart grid. Needless to say, the US standards are in desperate need of revision. They are about a million times too high as you will see in the INDPENDANTLY FUNDED expert opinions below, not to mention the way the waves are modulated and the power densities, all of which are excruciatingly biologically active. This issue is very deep and of course extremely damaging to our health and you full well know it.

I think it okay if people want to use a cell phone, provided they are given fair warning about the health effects and they are not exposing anyone else to their radiation emissions. This would mean creating areas for them to use their cell phones while leaving the majority of free space, free of radiation emissions. I have no faith at all that you will recommend this, so I won't waste too much time on it. Please just see below for the record, some of the studies and what the experts from those studies recommend.

Below these links are my websites. Please feel free to get in touch if you wish.

Here is a paper I wrote a few years ago...

The Legislators Guide to Warning Labels on Cell Phones and the Layman's Guide to the Science Behind Non Thermal Effects From Wireless Devices and Infrastructure

Our Law Suit Against the Utilities in the State of CA for Health Effects From Smart Meter Radiation:

<http://citizensforaradiationfreecommunity.org/wp-content/uploads/2013/06/COMPLAINT..1st amended..LASC ..Smartmeter Complaint SCEA-5a.doc>

Statement from AAEM

“Because smart meters produce Radiofrequency emissions, it is recommended that patients with the above conditions and disabilities be accommodated to protect their health. The AAEM recommends: that no smart meters be on those patients homes, that smart meters be removed within a reasonable distance of patients homes depending on the patients perception and/or symptoms and that no collection meters be placed near patients homes depending on patients perception an/or symptoms.”
